WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

1 Introduction

1.1 Purpose

This Unaudited Regulatory Disclosure Statement should be read in conjunction with 2021 Audited Financial Statements (“financial statements”). The financial statements and this Regulatory Disclosure Statement taken together comply with the Banking (Disclosure) Rules (“BDR”) under section 60A of the Banking Ordinance. The disclosure statement is prepared in accordance with the BDR and disclosure templates issued by the Hong Kong Monetary Authority (“HKMA”).

These banking disclosures are governed by the Bank’s disclosure policy, which has been approved by the Board of Directors. The disclosure policy sets out the approach to determine the content, appropriateness and frequency of the disclosures, the approach to ensure the relevance and adequacy of the disclosures, and the internal control over the process for making the disclosures. While the statement is not required to be externally audited, it has been subject to independent review in accordance with the Bank’s disclosure policy.

1.2 Basis of preparation

The capital adequacy ratio (“CAR”) was compiled in accordance with the Banking (Capital) Rules (“BCR”) issued by the HKMA. In calculating the risk-weighted assets (“RWA”), the Bank adopted the Standardized (Credit Risk) Approach for credit risk and the Standardized (Market Risk) Approach for market risk. For operational risk, the capital requirement is calculated using the basic indicator approach.

According to the BDR, disclosure of comparative information is not required unless otherwise specified in the standard disclosure templates.

Relevant information can be found in the Regulatory Disclosures section of our website, www.welab.bank.

1.3 Basis of consolidation

As of 31 December 2021, the Bank does not have any subsidiaries for consolidation purpose.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

2 Key prudential ratios

2.1 KM1: Key prudential ratios

The following table provides an overview of the Bank's key prudential ratios.

		At 31 December 2021	At 30 September 2021	At 30 June 2021	At 31 March 2021	At 31 December 2020
In HK\$'000		(a)	(b)	(c)	(d)	(e)
	Regulatory capital (amount)					
1	Common Equity Tier 1 (CET1)	429,247	474,354	447,870	414,050	425,315
2	Tier 1	429,247	474,354	447,870	414,050	425,315
3	Total capital	436,878	478,142	448,867	414,325	425,315
	RWA (amount)					
4	Total RWA	613,416	477,402	327,331	293,608	326,663
	Risk-based regulatory capital ratios (as a percentage of RWA)					
5	CET1 ratio (%)	69.98%	99.36%	136.82%	141.02%	130.20%
6	Tier 1 ratio (%)	69.98%	99.36%	136.82%	141.02%	130.20%
7	Total capital ratio (%)	71.22%	100.16%	137.13%	141.12%	130.20%
	Additional CET1 buffer requirements (as a percentage of RWA)					
8	Capital conservation buffer requirement (%)	2.5%	2.5%	2.5%	2.5%	2.5%
9	Countercyclical capital buffer requirement (%)	0.97%	0.95%	0.90%	0.87%	0.87%
10	Higher loss absorbency requirements (%) (applicable only to G-SIBs or D-SIBs)	0%	0%	0%	0%	0%
11	Total AI-specific CET1 buffer requirements (%)	3.47%	3.45%	3.40%	3.37%	3.37%
12	CET1 available after meeting the AI's minimum capital requirements (%)	56.22%	85.16%	122.13%	126.12%	115.20%
	Basel III leverage ratio					
13	Total leverage ratio (LR) exposure measure	2,854,896	2,311,664	2,654,876	1,623,757	1,651,156
14	LR (%)	15.04%	20.52%	16.87%	25.50%	25.76%
	Liquidity Coverage Ratio (LCR) / Liquidity Maintenance Ratio (LMR)					
	Applicable to category 1 institution only:					
15	Total high quality liquid assets (HQLA)	N/A	N/A	N/A	N/A	N/A
16	Total net cash outflows	N/A	N/A	N/A	N/A	N/A
17	LCR (%)	N/A	N/A	N/A	N/A	N/A
	Applicable to category 2 institution only:					
17a	LMR (%)*	205.93%	203.62%	306.63%	254.66%	853.86%
	Net Stable Funding Ratio (NSFR) / Core Funding Ratio (CFR)					
	Applicable to category 1 institution only:					
18	Total available stable funding	N/A	N/A	N/A	N/A	N/A
19	Total required stable funding	N/A	N/A	N/A	N/A	N/A
20	NSFR (%)	N/A	N/A	N/A	N/A	N/A
	Applicable to category 2A institution only:					
20a	CFR (%)	N/A	N/A	N/A	N/A	N/A

The increase in loans and advances to customers was the major driver leading to the decrease in CET 1 ratio and total capital ratio as of the year ended 31 December 2021.

* The LMR disclosed above represents the arithmetic mean of the average value of the LMR for each calendar month within the quarter.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

3 Overview of risk management and RWA

3.1 OVA: Overview of risk management

Overview of risk management

The Bank's risk management framework is designed to cover all business processes and ensure various risks are properly managed and controlled in the course of conducting business. The key financial risks related to the Bank's business include credit risk, counterparty credit risk, market risk, liquidity risk, interest rate risk, technology risk and operational risk. Further information on the management of these risks is set out below.

Risk culture

The Bank has implemented strong risk culture and considered it as one of the core values of the Bank and is endorsed by the Board of Directors ("the Board") and being followed by the senior management. The risk culture of the Bank is created through setting and complying with the risk management strategies and core risk management principles as well as establishing a sound risk management systems and effective risk management process to address material risks under normal and stressed conditions in a forward-looking approach. Risk awareness is promoted not only to business lines but also applied to all staff to enhance the Bank's overall risk management through appropriate training.

Risk governance

The Board has the ultimate responsibility for the effective management of risk and approves and oversees the Bank's overall risk management framework. The Board delegates its power to supervise the Bank's major functional areas, including products risk management, compliance, treasury and financial control, and the risks associated with them to the Risk Committee, the Audit Committee, and the Executive Committee. The Risk Committee in particular has the authority and responsibility to oversee and guide the overall management of the collective set of different risks undertaken by the Bank. The Chief Executive, Chief Risk Officer and other senior management and risk stewards have the responsibility to ensure various risk limits are appropriately established according to the risk management strategies set by the Board, and to oversee the effectiveness of managing and controlling risk in the day-to-day management of the Bank. At management level, Risk Management Committee ("RMC") and Asset and Liability Committee ("ALCO") oversee the risk management of the various risk types. Business units act as the first line of defence in risk management while other functional units, in particular, Risk, Compliance & Finance departments, which are independent from the business units, acts as the second line of defence, assist in managing different kinds of risks. Internal Audit Department, acts as the third line of defence, is responsible for providing independent assurance through conducting internal audits, and reporting to the Audit Committee on the quality of risk controls and management, the adequacy and the compliance of internal policies and procedures.

Risk appetite

The Bank's Risk Appetite Statement is reviewed and approved by the Board from time to time and at least annually with reference to evolving industry and market development, which describes the level of risk that the Bank is prepared to accept in pursuit of the Bank's strategic objectives. The Bank adopts a low risk appetite in managing and controlling risks in a prudent manner with a view to achieving steady growth and reasonable returns.

Various ratios and risk limits are set according to the legal, regulatory and operational resilience requirements to limit and control the risk exposure of the Bank under a risk tolerance level acceptable to the Bank and commensurate with the risk adverse culture as well as prudent management practice.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

3 Overview of risk management and RWA (continued)

3.1 OVA: Overview of risk management (continued)

Stress testing

Stress testing is a risk management tool and involves the use of various techniques to assess the Bank's potential vulnerability to adverse changes in market conditions. It is conducted with hypothetical as well as historical assumptions. With the establishment of various alerting levels under different scenarios, it helps to alert the management to adverse unexpected outcomes related to a variety of risks and provides an indication to the amount of financial resources (including capital and liquidity) that might be necessary for absorbing losses caused by, or to withstand, severe stressed conditions.

Risk information reporting, risk measurement and reporting systems

The Bank has developed various systems for risk measurement and reporting for different risk exposures. Further information on the measurement and reporting of credit risk, market risk, liquidity risk and interest rate risk in the banking book exposures are provided in this statement. Regular report on risk exposures and risk management activities of the Bank is presented to the Risk Committee. It covers the assessment on major risk exposures including credit risk, market risk, interest rate risk in the banking book, liquidity risk, legal risk, compliance and regulatory risk, operational risk, reputation risk, strategic risk and technology risk, conduct risk and model risk. The Bank continues to invest significant resources in IT systems and processes in order to maintain and improve the risk management capabilities.

Risk mitigation

The Bank applies different strategies and processes to mitigate different risks on an on-going basis. The progresses of these mitigations are tracked in respective governance platforms.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

3 Overview of risk management and RWA (continued)

3.2 OV1: Overview of RWA (continued)

		At 31 December 2021	At 30 September 2021	At 31 December 2021
		(a)	(b)	(c)
In HK\$'000		RWA		Minimum capital requirements
23	Capital charge for switch between exposures in trading book and banking book (not applicable before the revised market risk framework takes effect)	N/A	N/A	N/A
24	Operational risk	2,975	16,125	238
24a	Sovereign concentration risk	N/A	N/A	N/A
25	Amounts below the thresholds for deduction (subject to 250% RW)	–	–	–
26	Capital floor adjustment	–	–	–
26a	Deduction to RWA	–	–	–
26b	Of which portion of regulatory reserve for general banking risks and collective provisions which is not included in Tier 2 Capital	–	–	–
26c	Of which portion of cumulative fair value gains arising from the revaluation of land and buildings which is not included in Tier 2 Capital	–	–	–
27	Total	613,416	477,402	49,073

Increase in RWA for credit risk for non-securitization exposures as of 31 December 2021 was mainly due to the increase in loans and advances to customers.

Decrease in RWA for operational risk as of the year ended 31 December 2021 was mainly due to the change in calculation method for the operational risk capital charge from alternative approach to BIA approach.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

4 Linkages between financial statements and regulatory exposures (continued)

4.2 LI2: Main sources of differences between regulatory exposure amounts and carrying values in financial statements

The following table shows the main sources of differences between regulatory exposure amounts and the carrying values in the financial statements.

In HK\$'000		At 31 December 2021				
		(a)	(b)	(c)	(d)	(e)
		Items subject to:				
		Total	credit risk framework	securitization framework	counterparty credit risk framework	market risk framework
1	Asset carrying value amount under scope of regulatory consolidation (as per template LI1)	2,835,837	2,835,837			
2	Liabilities carrying value amount under regulatory scope of consolidation (as per template LI1)	–	–			
3	Total net amount under regulatory scope of consolidation	2,835,837	2,835,837			
4	Off-balance sheet amounts	–	–			
5	Differences due to consideration of provisions	7,830	7,830			
6	Exposure amounts considered for regulatory purposes	2,843,667	2,843,667			

4.3 LIA: Explanations of differences between accounting and regulatory exposure amounts

The key differences between accounting and regulatory exposure amounts are the differences due to consideration of provisions: The carrying values of assets in the financial statement are net of allowances. However, regulatory exposures under STC approach are net of specific allowances.

4.4 PV1: Prudential valuation adjustments

There is no prudential valuation adjustment as of 31 December 2021.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

5 Composition of regulatory capital

5.1 CC1: Composition of regulatory capital

The table below provides a breakdown of the constituent elements of total regulatory capital.

		At 31 December 2021	
		(a)	(b)
		Amount HK\$'000	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation
	CET1 capital: instruments and reserves		
1	Directly issued qualifying CET1 capital instruments plus any related share premium	1,353,000	(2)
2	Retained earnings	(870,686)	(3)
3	Disclosed reserves	10,019	(4)
4	<i>Directly issued capital subject to phase-out arrangements from CET1 (only applicable to non-joint stock companies)</i>	Not applicable	Not applicable
5	Minority interests arising from CET1 capital instruments issued by consolidated bank subsidiaries and held by third parties (amount allowed in CET1 capital of the consolidation group)	0	
6	CET1 capital before regulatory deductions	492,333	
	CET1 capital: regulatory deductions		
7	Valuation adjustments	–	
8	Goodwill (net of associated deferred tax liabilities)	–	
9	Other intangible assets (net of associated deferred tax liabilities)	63,086	(1)
10	Deferred tax assets (net of associated deferred tax liabilities)	–	
11	Cash flow hedge reserve	–	
12	Excess of total EL amount over total eligible provisions under the IRB approach	–	
13	Credit-enhancing interest-only strip, and any gain-on-sale and other increase in the CET1 capital arising from securitization transactions	–	
14	Gains and losses due to changes in own credit risk on fair valued liabilities	–	
15	Defined benefit pension fund net assets (net of associated deferred tax liabilities)	–	
16	Investments in own CET1 capital instruments (if not already netted off paid-in capital on reported balance sheet)	–	
17	Reciprocal cross-holdings in CET1 capital instruments	–	
18	Insignificant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–

Notes to the Template

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000
9	Other intangible assets (net of associated deferred tax liabilities)	63,086	63,086
	Explanation As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights (“MSRs”) may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI’s financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column “Basel III basis” in this box represents the amount reported in row 9 (i.e. the amount reported under the “Hong Kong basis”) adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

5 Composition of regulatory capital (continued)

5.1 CC1: Composition of regulatory capital (continued)

Notes to the Template (continued)

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000
10	Deferred tax assets (net of associated deferred tax liabilities) <u>Explanation</u> As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.	–	–
18	Insignificant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold) <u>Explanation</u> For the purpose of determining the total amount of insignificant LAC investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.	–	–

5 Composition of regulatory capital (continued)

5.1 CC1: Composition of regulatory capital (continued)

Notes to the Template (continued)

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000
19	Significant LAC investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–	–
	<u>Explanation</u> For the purpose of determining the total amount of significant LAC investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.		
39	Insignificant LAC investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	–	–
	<u>Explanation</u> The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant LAC investments in AT1 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 39 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.

20a	Total exposures before adjustments for specific and collective provisions	2,862,726	2,315,456
20b	Adjustments for specific and collective provisions	(7,830)	(3,792)
21	Total exposures after adjustments for specific and collective provisions	2,854,896	2,311,664
Leverage ratio			
22	Leverage ratio	15.04%	20.52%

The drop of leverage ratio is due to increase in on-balance sheet exposure such as balances with banks and loan and advances to customers.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

8 Liquidity

8.1 LIQA: Liquidity Risk Management

Qualitative disclosure related to liquidity risk management

Governance of liquidity risk management

The Bank's risk appetite is the risk level that the Bank is prepared to accept to achieve its strategic and business objectives. ALCO has been delegated by the Board to manage the Bank's liquidity risk strategy, procedures and practices. ALCO membership consists of the Chief Executive, Alternate Chief Executives, Chief Risk Officer and senior management members. The risk appetite and related limits are reviewed and approved by the Board and Risk Committee at least annually in order to align with industry standards, market developments and business conditions of the Bank.

An acceptable risk appetite is adopted in managing and controlling risks in a prudent manner to balance the risk and return that the Bank is prepared to take. Various ratios and risk limits are set with reference to the legal and regulatory requirements to limit and control the risk exposure under an acceptable risk appetite level and commensurate with prudent liquidity risk management practices.

The Bank's liquidity risk is monitored by the Risk Management Department, management and ALCO in accordance with the guidelines and procedures laid down in the liquidity risk management policy that has been reviewed and approved by the Board and ALCO periodically.

Liquidity risk management

The Bank's operation is mainly funded by customer deposits and shareholder's fund. Diversified and stable funding sources are maintained by determining the appropriate mix of liabilities and building strong and lasting relationships with key fund providers in accordance with the liquidity risk management policy.

Adequate liquidity will be maintained at all times to meet obligations when they fall due in normal circumstances and an appropriate mix of additional stock of high-quality liquid assets will be maintained to provide contingent liquidity in the event of a funding crisis.

Monitoring and reporting take the form of cash flow measurement and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for those projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

Stress testing

The liquidity stress-testing results form an important component in assisting the Risk Committee with reviewing and endorsing the Bank's risk appetite levels, which are defined by internal limits on various risk ratios, as well as assisting the ALCO in managing the overall liquidity of the Bank and to make informed strategic business decisions.

Contingency funding plan

The contingency funding plan is a component of the Bank's business contingency plan which describes the Bank's strategy for dealing with any liquidity problems, and the procedures for making up cash flow deficits in emergency situations.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

8 Liquidity (continued)

8.1 LIQA: Liquidity Risk Management (continued)

Quantitative disclosure related to liquidity risk management

Customised measurement tools or metrics

A cash-flow approach is adopted to manage liquidity risk by ensuring that a net positive cash-flow position is maintained or otherwise sufficient cash can be generated from assets or funding sources to cover any funding shortfalls. The projections are forward-looking and covers liquidity risks stemming from on-balance sheet assets and liabilities and off-balance sheet positions. Cash-flow projections are made over daily time bands of up to 7 days ahead and wider time bands of up to 1 year ahead. Internal limits are set to control the size of the cumulative net mismatch positions for the shorter-term time bands. Cash-flow projections cover positions in HK dollar and in all currencies aggregated. Separate cash-flow projections are also performed for individual foreign currencies in which there are of significant positions, such as US dollar.

Concentration limits on collateral pools and sources of funding

Retail deposits are the major and important part of the Bank's funding base, and the composition and quality of such deposits are carefully monitored and managed.

Liquidity exposures and funding needs of the Bank

The Bank, designated as a Category 2 bank, is not required to calculate the liquidity coverage ratio ("LCR") and net stable funding ratio ("NSFR") under the Banking (Liquidity) Rules. Instead, the Liquidity Maintenance Ratio ("LMR") is used to measure the short-term liquidity exposures of the Bank against its funding needs. The LMR is a ratio, expressed as a percentage, of the amount of a category 2 institution's "liquefiable assets" to the amount of the institution's "qualifying liabilities" (after deductions) over a calendar month. Under the Banking Ordinance and communication with HKMA, the Bank is subject to the statutory limit of the LMR, which is prescribed at 25%, whereas our Risk Appetite Statement limit for LMR has been set at 50% for prudent measures.

REGULATORY DISCLOSURE STATEMENT

9 Credit Risk for non-securitization exposures

9.1 CRA: General information about credit risk

The Bank takes on exposure to credit risk, which is the risk that a counterparty will cause a financial loss to the Bank by failing to discharge an obligation. The Bank's exposure to credit risk arises from treasury products.

The approach used for defining credit risk management policy and setting credit risk limits is described in note 3(a) to the audited financial statements.

Various analytical reports on credit risk exposures and credit risk management are provided regularly to senior management, including the portfolio distribution and credit quality, credit portfolio risk monitoring and compliance, impairment allowance and large exposures and risk concentrations.

The Bank's organization structure establishes a clear set of authority and responsibility for monitoring compliance with policies, procedures and limits. The Credit Risk Team is responsible for establishing credit policies, monitoring portfolio quality and impairment charge, ensuring compliance with statutory and internal lending limits, evaluating credit applications, making credit decisions etc.

The Chief Risk Officer takes charges of the Bank's overall credit risk management. He is responsible for ensuring that the Bank's risk management framework, all related policies and control procedures, and business processes are effective, adequate, properly implemented and consistent with the overall risk appetite of the Bank and credit related regulatory requirements. He is also responsible for assessing, evaluating and monitoring the use of risk limits and ensuring that quantifiable risks are within the approved limits.

Various units of the Bank have their respective credit risk management responsibilities. Business departments, being the first line of defence, are responsible for performing on-going 'know your customer' checks. The Credit Risk Team is independent from the business departments, acts as the second line of defence, is responsible for independent evaluation of credit applications, performing credit monitoring and review, and ensuring that all the relevant regulatory and statutory requirements and limits are complied with by the Bank. The Internal Audit Department, being the third line of defence, is responsible for examining and evaluating the adequacy and effectiveness of the internal controls, risk management and governance systems and processes of the Bank, and assessing compliance with regulatory and statutory requirements.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

9 Credit Risk for non-securitization exposures (continued)

9.4 CRB: Additional disclosure related to credit quality of exposures

The accounting definition of impaired exposures and the regulatory definition of defaulted exposures are generally aligned. In general, treasury products overdue for more than 90 days are considered impaired unless other information is available to indicate the contrary. Treasury products with a specific repayment date are classified as overdue when the principal or interest is past due and remains unpaid. Treasury products repayable by regular instalments are classified as overdue when an instalment payment is past due and remains unpaid. Treasury products repayable on demand are classified as overdue when a demand for repayment has been served on the borrower but repayment has not been made in accordance with the instruction.

The approach for determining impairment of financial assets is provided in notes 2(h) and 3(a) to the 2021 audited financial statements.

As of 31 December 2021, none of the treasury products has any indication of impairment.

9.5 CRC: Qualitative disclosures related to credit risk mitigation

The Bank has set out maximum credit exposure limit to each individual or counterparty in relations to the Banking (Exposures Limits) Rules. For capital calculation, the Bank has not used any on-balance sheet or off-balance sheet recognised netting for credit risk mitigation.

9.6 CR3: Overview of recognized credit risk mitigation

The following table sets out the extent of credit risk exposures covered by different types of recognised credit risk mitigation.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

9 Credit Risk for non-securitization exposures (continued)

9.7 CRD: Qualitative disclosures on use of ECAI ratings under STC approach

Under the standardised approach (“STC”) for the calculation of credit risk within the Basel capital framework, banks are required to use credit assessments provided by external credit assessment institutions (“ECAI”), recognised by the HKMA for the purposes of regulatory capital calculation, to determine the risk-weights of the banks’ credit exposures.

Standard & Poor’s Ratings Services, Moody’s Investors Service and Fitch Ratings are the ECAI that the Bank has used for the determination of risk weightings for the following exposures:

- Sovereign exposures
- Bank exposures
- Corporate exposures

The mapping of ECAI ratings of the above exposures to the risk weights under standardised approach follows the process as prescribed in Part 4 of the BCR. Where an exposure of debt securities has an issue-specific external credit assessment, such assessment will be used. In case there is no specific issue rating published by the ECAI, the issuer rating is applied to the senior unsecured claims of that issuer subject to the conditions prescribed by the BCR.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

10 Counterparty Credit Risk

10.1 CCRA: Qualitative disclosures related to counterparty credit risk (including those arising from clearing through CCPs)

Counterparty credit risk ("CCR") arises from derivatives and Securities Financing Transaction ("SFTs"). It is calculated in both the trading and non-trading books, and is the risk that a counterparty may default before settlement of the transaction. An economic loss occurs if the transaction or portfolio of transactions with the counterparty has a positive economic value at the time of default. Credit equivalent amount and capital charge for the relevant counterparty credit exposures are determined following the regulatory capital requirements. The Bank adopts the current exposure method to measure the credit equivalent amount, which comprises current exposures and potential future exposures. Credit equivalent amount and capital charge for the relevant counterparty credit exposures are determined following the regulatory capital requirements. The Bank adopts the current exposure method to measure the credit equivalent amount, which comprises current exposures and potential future exposures.

As of 31 December 2021, the Bank does not have any counterparty default risk exposures.

11 Market Risk

11.1 MRA: Qualitative disclosures related to market risk

Market risk is the risk of losses in assets, liabilities and off-balance sheet positions arising from movements in market rates and prices. Market risk exposures are separated into trading portfolios and non-trading portfolios.

The Bank's market risk exposures mainly arise from non-trading portfolios which comprise positions that related to the interest rate risk management of our banking assets and liabilities, financial investments designated as financial assets measured at Fair Value through Other Comprehensive Income ("FVOCI"), financial assets measured at amortised cost and exposures arising from our daily risk management operations.

The Bank has formulated market risk management policy to identify, measure, monitor, control, and report on the market risk, where appropriate, to allocate adequate capital to cover those risks.

Risk appetite has been defined in accordance with the Bank's business strategies and objectives to govern the market risk activities; and under the approved risk appetite, risk limits and management action triggers are set with reference to the nature, volume of transaction and risk appetite of the Bank. Market Risk Appetite is approved by the Board and the market risk limits are approved by the RC. Various systems are employed to facilitate the calculation, measurement, analysis and reporting of market risk and risk reports are prepared for different level of governance on a regular basis. Through different policies, sensitivity analysis, stress testing and limit structures, market risk analysis is conducted on different dimensions, including but not limited to risk factors, concentration, currencies and duration in the form of potential loss and impact to capital adequacy.

12 Interest rate risk in banking book

12.1 IRRBBA: Interest rate exposures in banking book

(a) Risk management purpose

Interest rate risk in the banking book is defined as the risk to both the earnings and the economic value of Welab Bank Limited (the “Bank”) arising from adverse movements in interest rates. Changes in market interest rates impact the economic value of assets, liabilities and relevant off-balance positions (Economic Value of Equity (“EVE”)) as well as the earnings from banking activities (Net Interest Income (“NII”)). The primary goal of the management of Interest Rate Risk in the Banking Book (“IRRBB”) is to ensure that interest rate risk exposures are maintained within the Bank’s risk tolerances.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

12 Interest rate risk in banking book (continued)

12.1 IRRBBA: Interest rate exposures in banking book (continued)

(b) Risk Management strategies

The Bank's interest rate exposures in the banking book mainly arise from lending, deposit taking and treasury activities, including investment of surplus fund in debt securities for the purposes of liquidity risk management and optimisation of the Bank's financial position. Interest rate risk arising from interest-bearing assets and liabilities has several aspects: basis risk arising from different interest rate benchmarks and gap risk arising from the term structure of banking book instruments. It also relates to positions from non-interest-bearing assets and liabilities including non-maturing deposits as well as from interest-bearing loans and liabilities.

Within the context of relevant IRRBB Policy approved by the Risk Committee ("RC"), it defines the organizational structure, responsibilities, limit structure and the methodological standards for analyzing and measuring IRRBB, reviews and monitors IRRBB exposures against risk limits. ALCO regularly reviews the market activities and conditions and ensures that effective decision on managing IRRBB are taken and implemented in a timely manner.

The Bank uses a range of techniques to measure IRRBB from the earnings and economic perspectives. These includes the methodology set out in the Banking Return (MA(BS)12A). They are used to simulate the impact of various interest rate scenarios, including the scenario described in the template IRRBB1, on the Bank's NII and EVE. Through EVE measures, changes in the net present value of assets, liabilities and off-balance sheet items are computed, subject to specific interest rate shocks and stress scenarios. Through earning-based measures on NII, changes on future profitability within a 12-month period, that could eventually affect the Bank's future levels of earnings and equity capital, are assessed.

Limits are set based on the Bank's level of capital. The various simulation results are prepared, monitored and reported to the ALCO regularly. The key results are also reported to the RC and the Board on a quarterly basis. Any breach in limits or triggers is immediately reported by the monitoring unit to Treasury, CRO and/or the members of ALCO about the breach and the underlying reason(s). The Bank's Treasury actively monitors changes in market conditions, which may require balance sheet rebalancing. Stress testing is used to evaluate the potential impact of adverse scenarios on the IRRBB, including the debt securities portfolio.

(c) Risk measurement frequency

The EVE/NII measures in accordance with the regulatory scenarios are calculated and monitored on a regular basis. The Bank assesses the interest rate risk exposures based on EVE results from the standard regulatory scenarios.

(d) Interest rate shock and stress scenarios

The Bank measures its vulnerability to loss under stressed interest rate market conditions. The measurement of IRRBB for EVE/NII is based on standard regulatory interest rate shock interest rate shocks scenarios.

(e) Hedging strategies and accounting treatment

All the hedge relationships of underlying hedged item(s)/risk and hedging transactions are documented and monitored if any.

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

12 Interest rate risk in banking book (continued)

12.2 IRRBB1: Quantitative information on interest rate risk in banking book

The values in Template IRRBB1 below are computed in accordance with the HKMA Return MA(BS)12A (the "Return"). The six interest rate scenarios and currency shifts are defined in the HKMA's SPM IR-1. At the bank level, the following impacts are assessed for each of the prescribed scenarios: (i) change in the economic value of equity (Δ EVE), using a constant balance sheet and an instantaneous shock; and (ii) the change in net interest income (Δ NII) over a forward-looking rolling 12-month period, using a constant balance sheet assumption and an instantaneous shock.

(in HKD Million)		(a)	(b)	(c)	(d)
		Δ EVE		Δ NII	
	Period	31 Dec 2021	31 Dec 2020	31 Dec 2021	31 Dec 2020
1	Parallel up	15	Not Applicable	–	Not Applicable
2	Parallel down	–	Not Applicable	–	Not Applicable
3	Steepener	–	Not Applicable		
4	Flattener	7	Not Applicable		
5	Short rate up	12	Not Applicable		
6	Short rate down	–	Not Applicable		
7	Maximum	15	Not Applicable	–	Not Applicable
	Period	31 Dec 2021		31 Dec 2020	
8	Tier 1 capital	436		425	

Positive values indicate losses to the Bank whereas negative values indicate profit to the Bank and the Bank first adopted the Banking Return of MA(BS)12A from June 2021.

As of 31 December 2021, the EVE worst scenario derived from the curve parallel up shift scenario (mainly +200 basis points for Hong Kong dollars) and remained well below the regulatory threshold corresponding to 15% of Tier 1 capital of the Bank (3.44% as of 31 December 2021).

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

13 International claims

International claims are on-balance sheet exposures of counterparties based on the location of those counterparties after taking into account the transfer of risk. Recognized risk transfer refers to the reduction of exposure to a particular country by an effective transfer of credit risk to a different country. For a claim on the branch of a bank or other financial institution, the risk will be transferred to the country where its head office is situated.

International claims on individual countries or segments, after risk transfer, amounting to 10% or more of the aggregated international claims are shown as below:

At 31 December 2021				
Non-bank private sector

20 Remuneration

20.1 REMA: Remuneration Policy

Disclosure on Remuneration System

The Remuneration Committee is delegated by the Board of the Bank and is independent of management. The Remuneration Committee is responsible to review remuneration policies and practices on annual basis or when necessary to ensure the remuneration policy is consistent with the principles set out under the HKMA Supervisory Policy Manual CG-1, CG-5 and other legal requirements. Two thirds of the Remuneration Committee are Independent Non-executive Director ("INED"). One Remuneration Committee meeting was held in the year of 2021.

Key Principles of Remuneration Policy

The remuneration policy and its implementation are subject to regular (at least annual) review by the Board of the Bank or the Remuneration Committee to ensure that the policy remains adequate and market competitive and that the operation of the remuneration system is consistent with the prevailing regulatory requirements and long term interests of the Bank. The policy applies to all staff members who are employed by the Bank. The principles of the Policy are as follows:

- Reinforce a business culture based on the highest ethical standards
- Manage risks to the Bank by encouraging prudent decision-making and in line with the objectives, business strategies and long-term goals of the Bank
- Reflect regulatory guidance in compensation program
- Attract and retain the best talent to lead the Bank to success
- Remunerate all staff members fairly and reasonably according to the individual level of competence and performance
- Performance evaluation is based on the balance of financial and non-financial factors including effective risk and people management
- Remuneration practices are set against comparable industry norms and to promote a "pay for performance" culture

WELAB BANK LIMITED

REGULATORY DISCLOSURE STATEMENT

20 Remuneration (continued)

20.1 REMA: Remuneration Policy (continued)

Disclosure on Remuneration System (continued)

Structure of Remuneration

The Bank's remuneration structure shall promote behaviour amongst staff members that supports the Bank's risk management framework and long-term financial soundness. The Bank's remuneration package consists of both fixed and variable (discretionary) compensation. Fixed remuneration refers to base salary (guaranteed) and allowance. Variable remuneration refers to variable bonus, incentives and shares or share-linked instruments such as share options or awards. An appropriate balance between fixed and variable remuneration will reflect the seniority, role and responsibilities of each staff member. The proportion of variable remuneration to total remuneration will increase in line with the seniority and job responsibilities of each staff member.

Senior Management & Key Personnel

Senior Management

Chief Executive, Alternate Chief Executive, executive directors, and other senior executives with a role in the Bank's business who report directly to the Chief Executive, i.e. all Chief or Deputy Chief Officers, Head of Operation and Head of Internal Audit. This category of staff is defined as responsible for oversight of the Bank's strategy or activities or those of the Bank's material business lines.

Key Personnel

Selected managers as defined and reported under the HKMA's definition of "Managers" and staff whose duties or activities in the course of their employment involve the assumption of material risk or the taking on of material exposures on behalf of the Bank.

Performance Measurement for Variable Remuneration

The award of variable remuneration shall depend on the fulfilment of budget income, peer group performance comparison and risk control factors. These criteria should include both financial, non-financial and risk factors. In allocating variable remuneration, the following factors should be taken into consideration:

- a. Overall performance of the Bank;
- b. Performance of the relevant business units;
- c. Contribution of individual staff member to such performance; and
- d. Risk control functions' input on the performance of relevant business unit and its staff members

The total amount of variable remuneration may be reduced in the event of an actual or expected deterioration in the financial performance of the Bank or staff misconduct (e.g. internal fraud, data leakage or damage to property etc.). The Chief Executive of the Bank has the authority to exercise discretion and flexibility to withhold all or part of the variable remuneration.

The remuneration of staff members in risk control functions should be determined in accordance with their performance objectives and should be independent of the performance of business units which they oversee.

Deferral Arrangement

A portion of variable remuneration may subject to deferral in the form of share options which will allow staff members' performance, including the associated risks, to be observed and validated over a period of time before part or all of the unvested share option is vested. This will enable the remuneration ultimately received by staff members to more accurately reflect risk and risk outcomes.
